

MST Series Alumina Mounting Shorts

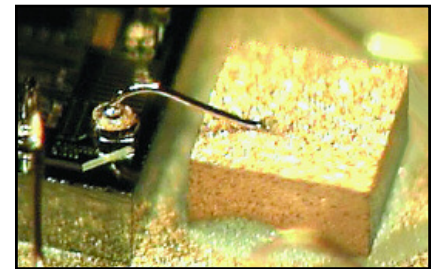

Alumina mounting shorts, with metallization on the top, bottom, and two of four sides, allow placement of a wirebond anywhere in the circuit, replacing the need for gold terminations on the substrate. They also can be used to raise the ground plane, reducing lead length for reduced inductance.

- INSTANT BONDING PADS
- FULLY CONDUCTIVE
- HEIGHT MATCHING
- REPLACES MOLY-TABS
- ANY SIZE AVAILABLE

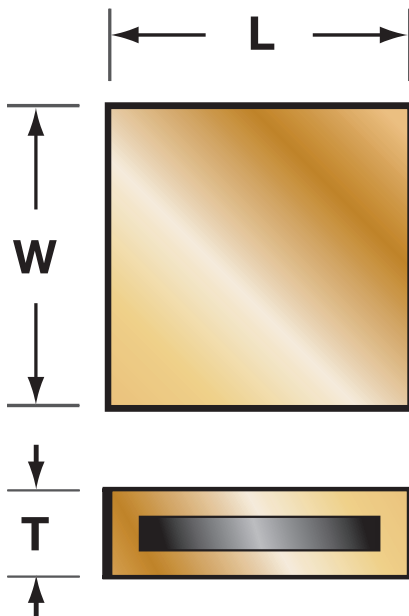

Wirebond

Raised Plane

MST Chip Dimensions

Mounting Shorts Part Number

MST - 20 x 20 x 6 - G	
Style	MST: 96 alumina
Length (milli-inches)	
Width (milli-inches)	
Thickness	3 to >60 mils
Metallization	G (gold) or T (tin)
